WORK EXPERIENCE

Software Developer-SolutionChamps Technologies Private Limited

Jun 2025 - Present

- Developed and maintained scalable enterprise web applications across multiple eCommerce domains.
- Built reusable, modular UI components to improve maintainability and development speed.
- Created custom NPM packages to standardize features and accelerate delivery.
- Integrated backend services and business modules to support core operational workflows.
- Implemented SSR and performance optimizations to improve SEO and page load speed.
- Delivered responsive, clean, and high-performance user interfaces following best practices.

Programmer-Osiz Technologies Private Limited

Jan 2022 - Jun 2025

- Contributed to building and scaling a high-traffic cryptocurrency platform with real-time features.
- Implemented secure authentication, compliance, and transaction verification workflows.
- Developed blockchain and DeFi features with a focus on performance, security, and reliability.
- Integrated wallet connectivity and optimized smart contracts for efficiency and lower costs.
- Ensured system stability through testing, audits, and best-practice security measures.

PROJECTS

Wondersoft - Retail & Pharmacy Management System

5 Months

- Designed and developed reusable Material UI components using a modular and scalable architecture to enhance code maintainability.
- Created and published customized NPM packages tailored to client specifications, improving project delivery efficiency.
- Integrated core modules such as POS and E-commerce, streamlining business operations and enhancing functionality.
- Implemented responsive user interfaces by applying industry best practices, ensuring optimal performance across devices.

Pepagora - B2B eCommerce Marketplace Platform

4 Months

- Developed a scalable global B2B marketplace platform, facilitating seamless interactions between suppliers and buyers.
- Implemented Server-Side Rendering (SSR) using Next.js to enhance website performance and SEO optimization.
- Designed and developed responsive modules for product listings and vendor management, improving user experience across devices.

Koinpark — Cryptocurrency Exchange Platform

30 Months

- Engineered a highly scalable cryptocurrency exchange platform supporting 100,000+ active users, maintaining optimal performance during peak traffic.
- Optimized real-time trading interface by implementing WebSocket technology, delivering low-latency updates and

- enhancing user engagement.
- Integrated end-to-end KYC, 2FA, and AML workflows to ensure strict regulatory compliance and strengthen platform security protocols.
 - Executed ParkScan transaction verification processes, significantly reducing fraudulent transactions and improving overall transaction integrity.

Wateenswap — Decentralized Finance (DeFi) Platform

6 Months

- Designed and deployed DeFi modules including swaps, staking, and liquidity pools to enhance platform capabilities and boost user engagement.
- Integrated MetaMask wallet, enabling secure and seamless transaction processing, resulting in improved user trust and increased retention rates.
- Conducted thorough testing and security audits on smart contracts to identify and mitigate vulnerabilities, significantly strengthening platform security.
