

SUMMARY

MERN Stack Developer with 3+ years of experience building scalable web applications and backend systems. Specialized in high-performance, secure architectures with real-time data handling. Experienced in E-commerce platforms, B2B marketplaces, cryptocurrency exchanges, and DeFi applications. Seeking a mid-to-senior MERN Stack Developer role to design and optimize end-to-end web solutions.

SKILLS

Frontend: HTML, CSS, SCSS, Bootstrap, Material UI, JavaScript, TypeScript, React.js, Next.js, Redux, Figma-to-Responsive UI Development

Backend: Node.js, Express.js, REST APIs, WebSocket, GraphQL, Sequelize ORM

Databases: MongoDB, MySQL, PostgreSQL, Redis

Dev Tools & Platforms: Git, GitHub, GitLab, Docker, Swagger, Cursor

Soft Skills: Team Collaboration, Leadership, Problem Solving, Adaptability

EXPERIENCE

SolutionChamps Technologies Private Limited – Coimbatore, India

June 2025 – Present

Software Developer

Project: Wondersoft - Retail & Pharmacy Management System

- Built reusable Material UI components with modular architecture and Storybook documentation.
- Developed and published NPM packages based on client requirements, enabling reusable, version-controlled components and improving development efficiency across projects.
- Applied core modules such as POS, Touch, and ECommerce.
- Delivered scalable, modular, and maintainable frontend-backend architecture.
- Implemented strict ESLint and Prettier configurations to ensure consistent code style, prevent bugs, and enforce best practices.

Project: Pepagora - B2B eCommerce Marketplace Platform

- Built a global B2B marketplace connecting suppliers and buyers.
- Implemented Server-Side Rendering (SSR) and dynamic SEO meta tags in Next.js to improve search visibility and page performance.
- Developed responsive modules for product listings, filtering, and vendor management.
- Implemented secure microservices using NestJS and MongoDB with an API Gateway.

Osiz Technologies Private Limited – Madurai, India

Jan 2022 – June 2025

Programmer

Project: Koinpark – Cryptocurrency Exchange Platform

- Built a scalable crypto exchange platform serving 100K+ users.
- Enhanced real-time trading UI with WebSocket for low-latency updates.
- Enforced secure backend services with Node.js, Express.js, and MySQL.
- Integrated KYC, 2FA, and AML workflows for compliance and user security.

- Improved API performance with Redis caching and rate limiting; prevented SQL injection and XSS.

Project: Wateenswap – Decentralized Finance (DeFi) Platform

- Created DeFi modules including swaps, staking, and liquidity pools using Solidity.
- Integrated MetaMask for secure on-chain transactions via Web3.js.
- Conducted smart contract testing and audits to ensure reliability and safety.

EDUCATION

B.Sc. Computer Science, Sourashtra College

Madurai, Tamil Nadu | 2017 - 2020
